

326 Forest School Diary 17th April 2026

Before the Easter break, the children in EYFS took part in an Easter Egg Hunt around the woodland. This was thoroughly enjoyed by all of the children as they searched high and low, to make sure there were no eggs left behind.

This week, Year 1 explored both the top and bottom woodland to investigate and identify new leaf growth on the trees. They gathered up various leaves and ticked them off on the identification chart provided.

Year 2 did not take part in Forest School on Friday before the Easter Holidays due to our Easter service.

Year 3 did not have their Forest School session this week due to staff training,

This week Year 4 used their Forest School skills to put together some weaving looms. These were made in various shapes and sizes using an assortment of foliage found in the woodland. Once completed, we hung them up in the woodlands for a touch of decoration.

Year 5 have made good progress with the shaduf they have been making recently in the woodland. The children have worked together to overcome any structural difficulties they have been faced with. We hope to put them to the test next week using our Forest School Pond.

This week we welcomed Year 6 back into the woodland for another high ropes session. The sun was shining which made it all the more enjoyable for everyone who took part.
