

330 Forest School Diary 15th May 2026

EYFS worked as a team as they set off on a bear hunt around the woodland. Searching high and low, the children did not give up until all the soft toys were all accounted for. Some of the children gave our new tree a good drink as it was noted it was looking rather thirsty.

The children in Year 1 planted pumpkin seeds into small pots. They will be bringing these home to take care of and watch them grow. The children then put their balancing skills to good use and had fun on the tight rope walk.

It was all about planting for Year 2 last week. First of all, the children each planted a pumpkin seed in a small container ready to take home and grow. This was then followed by working together to plant an evergreen tree here in the woodland. We plan to decorate this tree during Christmas this year, with ornaments crafted during our sessions.

This week Year 3 enjoyed a mixture of Forest School activities such as tree climbing, rope swing fun and crafting woodland mobiles and dream catchers from natural resources.

This week the children in Year 4 had a blast during their session, playing a game of catch the egg. First of all, the group made a nest for the egg using leaves, moss and dirt. They then played catch with the nest, being extra careful to keep it safe. The children demonstrated great listening and communication skills and exceptional reaction skills.

Year 5 used only their sense of touch to feel inside various boxes to try and guess what mystery items were inside. All of the children agreed it was a little scary putting your hands into the unknown! We finished off the session putting our balancing skills to good use navigating safely along the tight rope walk.

Year 6 did not have their Forest School session this week due to SATs.
